

FIBER OPTICAL
NETWORK SOLUTION

Pole Line Hardware Instruction

Defang provides banding and anchoring solutions for aerial FTTH fiber optic networks. We supply reliable overhead line hardware for outdoor aerial line deployment . Main products including stainless steel bands , stainless steel buckles , anchor brackets , tension hooks , pole-line bolts etc. All the hardware were long life designed and easy to operating during application.

We are improving our products with excellent design and reliable quality , to meet the new challenges of evolving global information markets.

www.defangtech.com

COMPANY INTRODUCTION

Defang Technology is a leading manufacturer and distributor of cable products, OEM power supplies, Fiber Optic Cables and Terminals.

We are specialized in designing, manufacturing and marketing various Cables (HDMI cable, CAT 5/6 cable, Audio & Video cables, computer cables, Fiber Optic cables), premise equipment power supplies/cables, FTTx Series and telecommunication products.

Majority Of Our products are sold in north America, south America and EMEA. Defang has earned high reputation from our customers for its excellent product quality, outstanding customer service (e.g., product customization, kitting and worry-free shipping and custom clearance) and lowest total cost Of ownership.

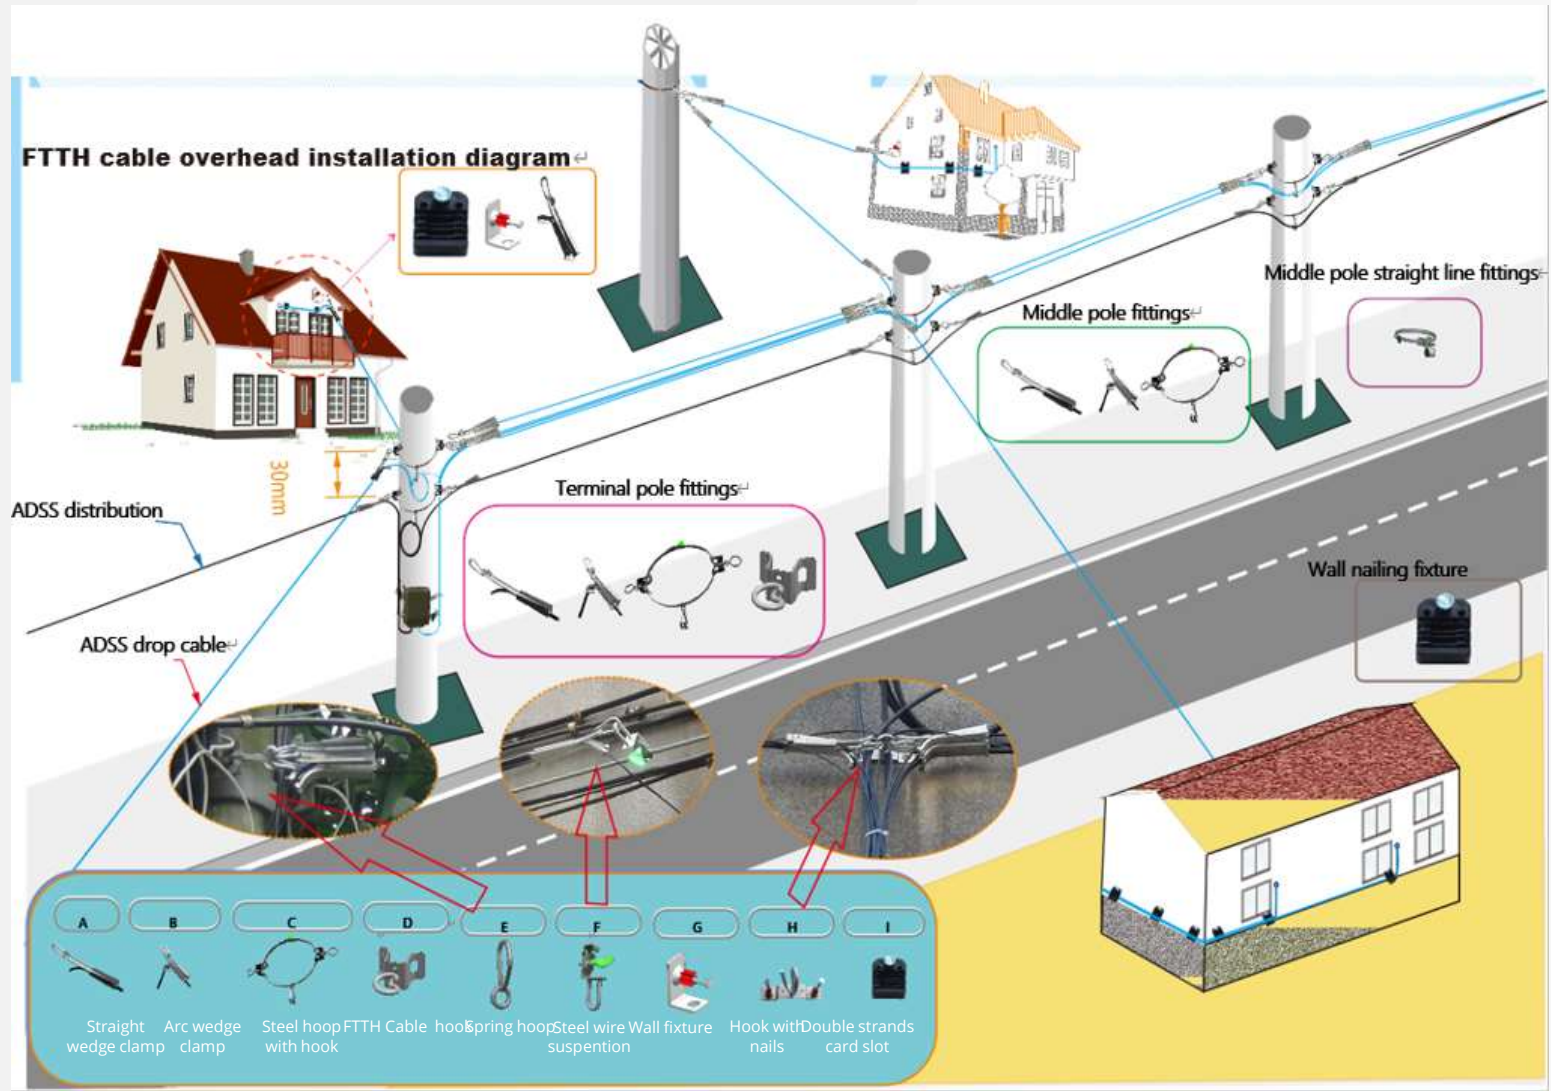

Defang's main office is in Shanghai, China and we have several manufacturing facilities in China and Mexico, all of which are compliant to ISO9001 :2000 standards.

Defang is a member Of HDMI Association and has HDMI ATC I .4 certification. All of our products are 100% RoHS compliant.

Defang takes pride in our quality control system and customer service-oriented culture. Our goal is to provide our customers high quality products with IOW cost Of ownership and with superior customer service. We want to be a responsible, flexible and value adding partner of your business.

A: Straight wedge clamp

Description

The cable clamp consist of conical shell and unibody designed wedge and wire loop. In the distribution segment of optical networks, the clamp can be used as drop cables for self-supporting aerial installation to connect branching points with access points for subscribers.

Key Features:

- Easy installation , no require other tools
- Both suitable for round or flat fiber drop cable
- Q195 carbon steel or 304 Stainless steel (the wedge and wire loop can be replaced to plastic)
- Removable and don't hurt cable jacket during application

Product image

Technical Specifications

| Product Number | Round cable diameter | Flat cable size h*w | Application Span | Tensile Strength | Materials |
|----------------|----------------------|---------------------|------------------|------------------|---------------------|
| DFHWCSS5-01 | 5 mm | <4 * (2-7) mm | ≤50 m | ≤1000 N | Q195 Steel |
| DFHWCSP5-03 | 3-6 mm | <4 X <13 mm | ≤30 m | ≤800 N | 304 + Plastic wedge |

* Conventional parameters, can be customized according to customer requirements

B: Arc wedge clamp

Description

The cable clamp consist of conical shell, shim and unibody designed wedge and wire loop. In the distribution segment of optical networks in FTTH , the cable can be used as indoor or outdoor drop cables for the self-supporting aerial installation to connect branching points with access points for subscribers.

Key Features:

- Easy installation , no require other tools
- Used for flat fiber drop cable
- Q195 carbon steel or 304 Stainless steel(Shell, wedge and shim can be switched to plastic as required)
- Removable and don't hurt cable jacket during application

Product image

Technical Specifications

| Product Number | Round cable diameter | Flat cable size h*w | Application Span | Tensile Strength | Materials |
|----------------|----------------------|---------------------|------------------|------------------|--------------------|
| DFHWCSP5-01 | NA | (2-5) * <(2-13) mm | ≤30 m | ≤1200 N | 304+Plastic shim |
| DFHWCSS3-01 | NA | (2-5) * <(2-12) mm | ≤30 m | ≤1000 N | 304+Black finished |
| DFHWCSS3-01 | NA | (2-5) * <(2-12) mm | ≤30 m | ≤1000 N | 304 |
| DFHWCSS4-01 | NA | (2-5) * <(3-5) mm | ≤30 m | ≤1500 N | 304+Black finished |
| DFHWCPP5-01 | NA | (2-5) * <(2-13) mm | ≤30 m | ≤1200 N | All plastic |

* Conventional parameters, can be customized according to customer requirements

More commonly used clamps

S Type dead-end fiber clamp

Description

The S Type dead - end FTTH fiber clamp is designed to anchor and support flat or round fiber optical cable on dead - end routes during outdoor FTTH network constructions.

Key Features:

- Easy installation , no require other tools
- Both suitable for round or flat fiber drop cable
- 201 or 304 Stainless steel and UV resistant plastic
- Removable and don't hurt cable jacket during application
- Good insulating property
- High mechanical strength

Product image

Technical Specifications

| Product Number | Round cable diameter | Flat cable size | Application Span | Tensile Strength | Materials |
|----------------|----------------------|-----------------|------------------|------------------|---------------------------------|
| DFHWCP-S01 | Φ0.4~1.5 mm | 2.0 * 3.0 mm | ≤50 m | ≤1200 N | PA + 304 |
| DFHWCP-S02 | Φ0.4~1.5 mm | 2.0 * 3.0 mm | ≤50 m | ≤800 N | Nylon + 304 |
| DFHWCP-S03 | Φ0.4~1.5 mm | 2.0 * 3.0 mm | ≤50 m | ≤800 N | Nylon + 304 With Closed hoop |

* Conventional parameters, can be customized according to customer requirements

More commonly used clamps

ADSS Wedge Type anchor clamp

Description

Wedge type anchor Clamp is designed to tension the ADSS optical fiber cable on aerial poles. It is applied together with fiber optical cable on straight routes of maximum distance up to 70 meters

Key Features:

- Hand installation , no request other tools
- UV resistant polymer stainless steel material guarantee long period usage
- Self- adjustable wedge , enough to keep cable in tight strength position

Product image

Technical Specifications

| Product Number | ADSS cable size | Wire bail | Application Span | Tensile Strength | Materials |
|----------------|-----------------|-----------|------------------|------------------|---------------|
| DFHWCP-S04 | 5 mm | Φ2.5 mm | ≤50 m | ≤2000 N | PA + Q195 |
| DFHWCP-S05 | 4~14mm | Φ2.5 mm | ≤50 m | ≤2000 N | Polymer + 304 |
| DFHWCP-S06 | 6~9mm | Φ2.5 mm | ≤70 m | ≤3000 N | Polymer + 304 |
| DFHWCP-S07 | 12~16mm | Φ2.5 mm | ≤100 m | ≤6000 N | Polymer + 304 |

* Conventional parameters, can be customized according to customer requirements

More clamps can be found from us

C: Steel hoop with hook

Description

The steel hoop with hooks is used on communication poles for setting anchoring clamp point.

The steel hoop Fiber optic cable hoop was designed to applied with wooden , concrete or metal poles , it provide 6 points for drop wire clamp , usually used in aerial fiber to home (FTTH) line constructions .

Key Features:

- Easy installation , only need screwdriver during application
- Adjustable diameter
- Hot-dip galvanized steel plate and weatherproof hardware fitting
- Used together with wedge clamp
- High mechanical strength

Product image

Technical Specifications

| Product Number | Pole application diameter | Tensile Strength |
|----------------|---------------------------|------------------|
| DFHHP-01 | 170~230 mm | ≤2500 N |

* Conventional parameters, can be customized according to customer requirements

More commonly used hoop

Stainless steel strapping banding and buckle

Description

Stainless steel strapping banding is designed for attaching cable clamps, such as suspension clamps, tension clamps and hooks, on dead-end and intermediate routes of main or end-use electrical connections.

Stainless steel buckle is applied with stainless steel strapping bandings and banding tools

Key Features:

- Need banding tool to install
- Adjustable diameter
- 201 or 304 Stainless steel and weatherproof hardware fitting
- Rounded edges and a smooth surface
- Used together with suspension clamp and hooks
- High mechanical strength

Product image

Technical Specifications

| Product Number | Width | Thickness | Materials | Length |
|----------------------------|---------|-----------|------------------|----------------|
| DFHBB-01 buckle | 1/2" | 0.05" | 304 | |
| DFHBB-03 buckle | 3/4" | 0.05" | 304 | |
| DFHBB-05 strapping banding | 1/2" | 0.03" | 304 | 100ft, 30m,50m |
| DFHBB-06 strapping banding | 3/4" | 0.03" | 304 | 100ft, 30m,50m |
| DFHBB-04 banding tool | < 20 mm | <1.5 mm | Galvanized steel | |

* Conventional parameters, can be customized according to customer requirements

More commonly used hoop

Plastic strapping banding and buckle

Description

Plastic strapping banding is designed for attaching cable clamps, such as suspension clamps, tension clamps and hooks, on dead-end and intermediate routes of main or end-use electrical connections.

Strap Material is extruded from a black Polyoxymethylene resin, has long-term creep resistance, long-term fatigue resistance and excellent resistance to UV, moisture, chemicals, solvents and fuels

Key Features:

- Need banding tool to install
- Adjustable diameter
- Polyoxymethylene resin
- Used together with suspension clamp and hooks
- High mechanical strength

Product image

Technical Specifications

| Product Number | Width | Thickness | Materials | Length |
|------------------|-------|-----------|------------------------|------------|
| DFHBB-07 banding | 1/2" | 0.055" | Polyoxymethylene resin | 100ft, 50m |
| DFHBB-08 buckle | 1/2" | NA | Plastic + 304 | |

* Conventional parameters, can be customized according to customer requirements

E: Spring hoop

Description

The hoop on poles is used as the anchor contact point for spring buckle to make flexible connection.

It is designed to tension, or suspension drop cable wire clamps or FTTH anchor clamps with suitable fiber optical cable in outdoor overhead FTTH network constructions.

Key Features:

- Easy installation , no require other tools
- Flexible layout of various use scenarios for clamp and hook
- Galvanized steel material, metal, corrosion resistant and durable
- High mechanical strength

Product image

Technical Specifications

| Product Number | Tensile Strength |
|----------------|------------------|
| DFHHP-02 | ≤600 N |

* Conventional parameters, can be customized according to customer requirements

D: FTTH C type cable hook

Description

The FTTH C type hook is used on communication poles for setting anchoring clamp point.

It is designed to tension, or suspension drop cable wire clamps or FTTH anchor clamps with suitable fiber optical cable in outdoor overhead FTTH network constructions.

Key Features:

- Easy install and operate to save labor cost
- Apply with drop clamp on dead end route
- Galvanized steel material, metal, corrosion resistant and durable
- Can be installed wooden and building by screws
- High mechanical strength

Product image

Technical Specifications

| Product Number | Tensile Strength |
|----------------|------------------|
| DFHBH-09 | ≤1500 N |

* Conventional parameters, can be customized according to customer requirements

H: Hook with nail

Description

The hook is used to set an anchoring point on walls after nail both side on walls to provide a more powerful tensile strength.

It is designed to tension, or suspension drop cable wire clamps or FTTH anchor clamps with suitable fiber optical cable in outdoor overhead FTTH network constructions.

Key Features:

- Easy installation , only need screwdriver during application
- Flexible layout of various use scenarios for clamp and hook
- Galvanized steel material, metal, corrosion resistant and durable
- High mechanical strength

Product image

Technical Specifications

| Product Number | Tensile Strength |
|----------------|------------------|
| DFHBH-10 | ≤400 N |

* Conventional parameters, can be customized according to customer requirements

More commonly used Hook and bracket

Cable anchoring clamp bracket

Description

The cable anchoring clamp bracket is designed to tension, or hook drop wire clamps with suitable fiber optical in outdoor overhead FTH network constructions.

Key Features:

- Apply with tension clamp on dead end route
- Compact size but with high mechanical strength
- Galvanized steel material , corrosion resistant and durable
- Can be installed wooden , metal , concrete poles or building by bolt or stainless-steel band
- Fixed by stainless steel band (20-10 mm) or four 4mm diameter bolts

Product image

Technical Specifications

| Product Number | Tensile Strength |
|----------------|------------------|
| DFHBH-11 | ≤1500 N |

* Conventional parameters, can be customized according to customer requirements

More commonly used Hook and bracket

Universal pole bracket

Description

The universal pole bracket designed for tension and suspension the ADSS fiber optic cable clamps or Figure eight fiber optic cable clamps, in fiber optic cable deployment of outdoor telecommunication networks.

Key Features:

- Three fixation points
- Easy installation
- Stainless steel strapping application
- Pole Bolt and nut application
- High mechanical strength

Product image

Technical Specifications

| Product Number | Tensile Strength |
|----------------|------------------|
| DFHBH-12 | ≤9000 N |

* Conventional parameters, can be customized according to customer requirements

More commonly used Hook and bracket

Fiberglass Extension Arm

Description

Fiberglass Extension Arm Pole Mount Bracket Suspension Clamp are used in aerial construction to provide a set distance from the Utility Poles for mounting Suspension Clamps.

Key Features:

- Cleats to prevent bracket rotation on poles
- Accepts 5/8" (16mm) Mounting Hardware
- Both End Fittings are made of high strength Ductile Iron.
- Reinforced Epoxy Fiberglass Rod diameter is 1-1/2" (38mm).
- Secured using either traversing bolts or a double stainless-steel banding on the pole.

Product image

Technical Specifications

| Product Number | Length | Minimum Ultimate Vertical Load |
|----------------|--------|--------------------------------|
| DFHBH-01 | 12" | ≤6000 N |
| DFHBH-07 | 24" | ≤5000 N |
| DFHBH-08 | 36" | ≤4000 N |

* Conventional parameters, can be customized according to customer requirements

More hooks and brackets can be found from us

* Conventional parameters, can be customized according to customer requirements

F: The steel wire suspension clamp

Description

The steel wire suspension is fixed on the steel wire, be used to set an anchoring point on steel wire.

It is designed to tension, or suspension drop cable wire clamps or FTTH anchor clamps with suitable fiber optical cable in outdoor overhead FTTH network constructions.

Key Features:

- Easy installation , no require other tools
- Flexible layout of various use scenarios for clamp and hook
- Galvanized steel material, metal, corrosion resistant and durable
- High mechanical strength

Product image

Technical Specifications

| Product Number | Tensile Strength |
|----------------|------------------|
| DFHSC-05 | ≤600 N |

* Conventional parameters, can be customized according to customer requirements

More commonly used wire suspension

J type suspension clamp

Description

J type ADSS suspension clamp is developed for to suspending and supporting ADSS cable in outdoor overhead FTH solutions . This optical fiber cable accessories can be installed on short spans at intermediate poles.

Key Features:

- Easy operating , no need other tools
- UV resistant plastic and galvanized steel , durable
- Applied with stainless steel bands and pole bolts
- High mechanical tensile strength

Product image

Technical Specifications

| Product Number | Cable Size | Tensile Strength |
|----------------|------------|------------------|
| DFHSC-06 | 8-15 mm | ≤4000 N |
| DFHSC-07 | 5-8 mm | ≤4000 N |

* Conventional parameters, can be customized according to customer requirements

More commonly used wire suspension

Cable Suspension Clamp

Description

Used to attach strand to straight line pole. Features grooves for greater clamping area without damage to guy strand. Bolts have shoulders to prevent turning when nut is tightened.

Key Features:

- Accepts 3/16"(6M) to 1/2"(25M) strand
- Consists of two plates , and two 1/2" track bolts with attached nuts
- Plates are 1-11/16" wide and 5-3/4" long
- Center hole accepts 5/8" Thru Bolts
- Carton steel with hot dip galvanized
- High mechanical tensile strength

Product image

Technical Specifications

| Product Number | Strand Size |
|-------------------------|------------------------|
| DFHSC-01 straight clamp | 3/16"(6M) to 1/2"(25M) |
| DFHSC-02 angel clamp | 3/16"(6M) to 1/2"(25M) |

* Conventional parameters, can be customized according to customer requirements

**More suspension
clamps can be found
from us**

Universal pole bracket

G: Wall fixture

Description

The wall fixture is used to set an anchoring point on walls after nail on walls.

It is designed to tension, or suspension drop cable wire clamps or FTTH anchor clamps with suitable fiber optical cable in outdoor overhead FTTH network constructions.

Key Features:

- Easy installation , only need screwdriver during application
- Flexible layout of various use scenarios for clamp and hook
- Galvanized steel material, metal, corrosion resistant and durable
- High mechanical strength

Product image

Technical Specifications

| Product Number | Tensile Strength |
|----------------|------------------|
| DFHBB-15 | ≤100 N |

* Conventional parameters, can be customized according to customer requirements

More commonly used fixture or Fastener

Bolts with nuts and washers

Description

Bolt with nuts is used for fastening pole line hardware to crossarms, poles, and other structures

Key Features:

- Easy installation , only need screwdriver during application
- Galvanized carbon steel or stainless steel, corrosion resistant and durable
- High mechanical strength

Product image

Technical Specifications

| Product Number | Thread Spec | Length , inch | Materials |
|------------------------------|-------------|---------------|-------------------------|
| DFHBB-01 with nut | 5/8" | 10" | Galvanized carbon steel |
| DFHBB-02 with nut | 5/8" | 12" | Galvanized carbon steel |
| DFHBB-04 with nut | 5/8" | 16" | Galvanized carbon steel |
| DFHBB-05 with nut | 5/8" | 18" | Galvanized carbon steel |
| DFHBB-06 with nut | 5/8" | 20" | Galvanized carbon steel |
| DFHBB-10 with nut and washer | 7/16" | 1.5" | Stainless steel |
| DFHBB-11 with nut and washer | 7/16" | 1.8" | Stainless steel |

* Conventional parameters, can be customized according to customer requirements

I: Double strands card slot

Description

The double strands card slot is a kind of optical cable fittings, and it is used to hold the drop cable along the wall after nail it. In FTTH tail installation, it is widely used to solve the cabling on outdoor wall.

Key Features:

- Easy installation , only need screwdriver during application
- Flexible layout of various use scenarios for clamp and hook
- Galvanized steel material, and the plastic part is ABS
- UV resistant for ABS part, durable

Product image

Technical Specifications

| Product Number | Tensile Strength |
|----------------|------------------|
| DFHSC-08 | ≥50 N |

* Conventional parameters, can be customized according to customer requirements

J: Helical strand wire

Description

The helical strand wire, other called preformed guy grip or dead-end guy grip is developed to grip and tension ADSS cable during construction of internet network lines on wooden or concrete poles, as analogy of classical wedge type tension clamps

Key Features:

- Easy operation, no need other tools
- Made of hot dip galvanized steel, weather resistant
- With sand and glue to improve friction between cables
- Customized products is available upon requests
- High tensile strength

Product image

Technical Specifications

| Product Number | ADSS Cable size, mm | Wires configuration | Length, mm | Tensile Strength, KN |
|----------------|------------------------------|---------------------|------------|----------------------|
| DFHDES2X3 | 4.4-4.9 | 2.0 * 3 | 450 | 0.5~2 |
| DFHDES2X4 | 8.5-9.4 | 2.0 * 4 | 450 | 4~7 |
| Product Number | Strand rope, mm ² | Wires configuration | Length, mm | Tensile Strength, KN |
| DFHDES3X6 | 90 | 3.0 * 6 | 960 | 100 |
| DFHDES3X5 | 38 | 2.8 * 5 | 660 | 42 |
| DFHDES2X3-02 | 35 | 2.0 * 3 | 430 | 8 |
| DFHDES2.5X5 | 30 | 2.5 * 5 | 610 | 32 |

* Conventional parameters, can be customized according to customer requirements

More helical strand wire can be found from us
